

INDEX TO VOLUME XVII

Adams, J. F., and Atiyah, M. F. <i>K</i> -theory and the Hopf invariant	31
Al-Salam, W. A. On a characterization of Meixner's polynomials	7
Andrews, G. E. On basic hypergeometric series, mock theta functions, and partitions (I)	64
— On basic hypergeometric series, mock theta functions, and partitions (II)	132
Atiyah, M. F. Power operations in <i>K</i> -theory	165
— <i>K</i> -theory and reality	367
— see Adams, J. F.	
Atkin, A. O. L. A note on ranks and conjugacy of partitions	335
Austin, A. K. A closed set of laws which is not generated by a finite set of laws	11
Barcus, W. D. Principal bundles and Hirsch's spectral sequence	321
Brualdi, R. A., and Newman, M. Proof of a permanental inequality	234
Chaundy, T. W. On Appell's fourth hypergeometric function	81
Cohn, J. H. E. A theorem of Bargmann's	51
Das, G. On some methods of summability	244
Davenport, H., and Lewis, D. J. Notes on congruences (III)	339
Dowker, C. H. Composite morphisms in abelian categories	98
Du Plessis, N. Some further examples associated with the Dirichlet problem	1
Eastham, M. S. P. A short proof of a theorem in eigenfunction theory	144
— A condition for the spectrum in eigenfunction theory to contain $[0, \infty)$	146
Edwards, D. A. A class of Choquet boundaries that are Baire spaces	282
Evans, W. D. Eigenfunction expansions associated with the Dirac relativistic equations	211
— A problem in relativistic quantum mechanics	345
Evelyn, C. J. A. A relationship for the Möbius function	281
Harvey, W. J. Cyclic groups of automorphisms of a compact Riemann surface	86
Hoare, A. H. M., and Parry, W. Semi-groups of affine transformations	106
Horrocks, G. On extending vector bundles over projective space	14
James, I. M. A relation between Postnikov classes	269
Kővari, T. On the growth of entire functions of finite order with density conditions	22

Larman, D. G. Subsets of given Hausdorff measure in connected spaces	239
Lewis, D. J. , <i>see</i> Davenport, H.	
McLeod, J. B. On the distribution of eigenvalues for an n th order equation	112
— The number of integrable-square solutions of ordinary differential equations	285
Maddox, I. J. Note on Riesz means	263
Marcus, M. The Cauchy-Schwarz inequality in the exterior algebra	61
Martin, N. F. G. Continuity properties of the entropy	44
Mauldon, J. G. Continuous functions with zero derivative almost everywhere	257
Michael, I. M. Eigenfunction expansions associated with partial differential equations	291
Mirsky, L. Transversals of subsets	58
Munn, W. D. Uniform semilattices and bisimple inverse semigroups	151
Newman, M. , <i>see</i> Brualdi, R. A.	
Noble, M. E. Changes of sign and singularities of power series	359
Northover, Anne P. Modules over a one-dimensional local ring	195
Parry, W. , <i>see</i> Hoare, A. H. M.	
Perfect, Hazel. Symmetrized form of P. Hall's theorem on distinct representatives	303
Pitts, C. G. C. Asymptotic approximations to solutions of a second-order differential equation	307
Schwarzenberger, R. L. E. Extendible vector bundles over real projective space	19
Stein, N. Note on a realization of Whitehead products	160
Thomas, E. Cross-sections of stably equivalent vector bundles	53
Tverberg, Helge. On the irreducibility of polynomials $f(x)+g(y)+h(z)$	364
Wright, E. M. Coefficients of a reciprocal generating function	39
